

Submittee: Bryant Moodie
Date Submitted: 2010-11-02 10:24
Title: 2010 Wave Phenomena IV
Event Type: Conference-Workshop

Location:
University of Alberta, Edmonton, Alberta, Canada

Dates:
June 14-18, 2010

Topic:
Waves in Fluids from the Microscopic to the Planetary Scale

Methodology:
There were eight plenary sessions that ran each day from 9:30AM to 3:30PM and these were followed by parallel sessions that ran from 4:00PM until 5:20PM. The plenary sessions were not in parallel so that all participants could attend all plenary lectures.

Scientific Highlights:
The organizers felt that a real highlight of the meeting was the quality of the results presented by the graduate students who attended.

Organizers:
Moodie, Bryant, Applied Mathematics Institute, University of Alberta Bush, Andrew, Applied Mathematics Institute, University of Alberta Craster, Richard, Applied Mathematics Institute, University of Alberta Sutherland, Bruce, Applied Mathematics Institute, University of Alberta Swaters, Gordon, Applied Mathematics Institute, University of Alberta

Speakers:
See the attached PDF booklet listing all speakers together with their affiliations and abstracts of their talks
