

Pacific Institute *for the* Mathematical Sciences

PIMS MONTHLY CONNECTION | September 2019

Hello from PIMS

As summer comes to an end so does the hectic season of PIMS events. It's been an incredible year of building on the success of our signature programs that we run annually, such as the *Emerging Indigenous Scholars Summer Camp* pictured above, as well as introducing a host of new and groundbreaking events across the entire PIMS network.

We'd like to say a big thank you to all those who have helped organize these events, which continue the important contribution that PIMS makes to the mathematical sciences.

IMPORTANT NOTICES:

1. CRM-Fields-PIMS Prize Lecture: Nassif Ghoussoub, UBC, Sept 13. [Learn more.](#)
2. 41st Annual Meeting of Alberta Statisticians, Sept 28. [Register now.](#)
3. PIMS-UManitoba Distinguished Lecture: Bard Ermentrout, Oct 9, UManitoba. [Learn more.](#)

As we roll into a new academic year there are a number of great events on our [calendar](#).

Sincerely,
The PIMS Team

FEATURE EVENTS

[Ghoussoub](#)**September 13, The University of British Columbia.**

The CRM-Fields-PIMS prize is the premier Canadian award for research achievements in the mathematical sciences. It is awarded jointly by the three Canadian mathematics institutes. The winner receives a monetary award and an invitation to present a lecture at each institute within one year after the award is announced.

**[63rd Cascade Topology Seminar](#)****September 14 - 15 at the University of Manitoba**

The theme of this conference will be low-dimensional topology and the connections with mapping class groups and related topics in geometric group theory.

**[The 14th Richard & Louise Guy Lecture Series: Alice Silverberg](#)****September 19, 2019, The University of Calgary.**

Join Alice Silverberg as we discuss cryptography through the ages, and how modern cryptography uses mathematics, especially the field of number theory.

**[41st Annual Meeting of Alberta Statisticians](#)****September 28 at the University of Calgary**

The meeting is open to faculty, graduate students and non-academic statisticians in Alberta to interact, and discuss their research.

**[PIMS - UManitoba Distinguished Lecture: Bard Ermentrout](#)****October 9 at the University of Manitoba**

If Space Turned out to be Time: Resonances and Patterns in the Visual Cortex

NEWS & ANNOUNCEMENTS

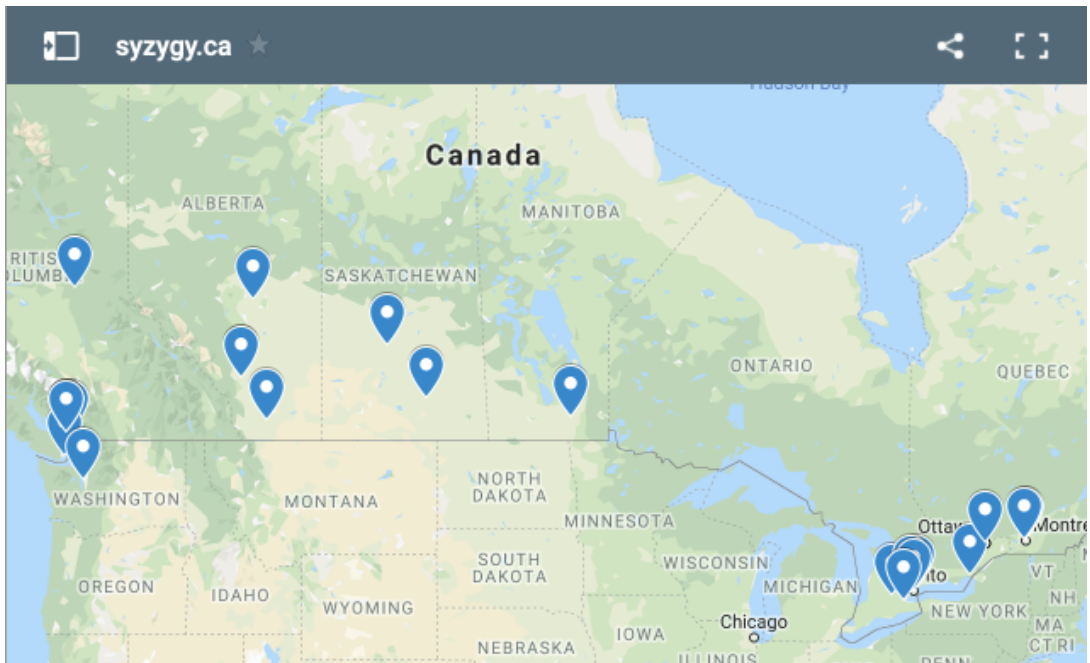

[Data Science For Albertans Industry Fellowships](#)

with emerging data scientists who are looking for in-the-field experience.

The four-week industry fellowships brought together six companies wanting to leverage data science, and 22 newly trained data scientists in Edmonton and Calgary.

National Scale Interactive Computing with Syzygy

PIMS Director, James Colliander, writing for the Jupyter Blog

Syzygy, a cloud-hosted interactive computing platform that delivers JupyterHub deployments for universities across Canada.

MEDIA

[Breaking Down Barriers in Indigenous Education](#)

Empowering Indigenous students to enrol in an undergraduate STEM program and succeed in their careers.

The Pacific Institute for the Mathematical Sciences (PIMS) was created in 1996 to promote **discovery, understanding and awareness** in the mathematical sciences. PIMS has expanded from the mathematics community of **Alberta** and **British Columbia** to include **Washington State, Saskatchewan** and **Manitoba**. We are proponents of mathematical **collaboration with industry, innovation in mathematics education** from K-12 to graduate level initiatives, **public outreach** and **partnerships** with similar organizations around the globe. We fund Collaborative Research Groups, Post-Doctoral Fellowships, individual events, and competitive prizes in mathematics.
